Telephone: +973 (17239 731)
+973 (17239 765)
Fax: +973 (17239 484)

For Hotel reservation:
+973 (17239 694) or +973 (3197 533)
Date and Time:
3 days Intensive Training Program
27th to 29th May 2013
8:15 am to 1:15 pm

Workshop Language:
English

Fees:
BD 300 per participant

Method of pay fees:
1. Check/to Arabian Gulf University-Bahrain Islamic Bank (BisB)
2. Bank transfer, Account no:
   A/C 1000 0000 4834
   IBAN: BH95BIBB00 1000 0000 4834
   Islamic Bank (BisB)

Lecturer:
Dr. Cristina Skrypnyk is a Consultant Physician in Medical Genetics, working since 2010 in Al Jawhara Center for Molecular Medicine and an Assistant Professor at College of Medical Science, Arabian Gulf University-Bahrain. With a PhD in Medical Genetics and international training courses and fellowships in the cytogenetics, molecular genetics and genetic counselling, Dr. Cristina Skrypnyk focus her professional activity in helping patients with genetics disorders to have access to early and proper diagnosis and counselling. She is a member of many international scientific and medical societies and also an active volunteer member of genetic disorders patients organisations in Europe.

Short description:
“How to recognize and manage a genetic disorder” is a three days workshop addressed to clinicians seeking an up-to-date overview of the field of medical genetics today. The workshop is focusing on the importance of clinical signs and symptoms in choosing the adequate genetic tests analysis for a proper diagnosis and management of genetic disorders patients.

The workshop topics will cover:
- Family history and the pedigree pattern in identifying a genetic disorder
- Dysmorphic features recognition
- Genetic tests and their interpretation and implication
- Genetic databases help in clinical practice
- Management and support groups for genetic disorders
- Genetic counseling and risk assessment

Target:
general physicians and specialist physicians from different medical fields dealing with genetic disorders patients (obstetricians, neonatologists, pediatricians, internal medicine, etc).

Workshop objective:
- To increase the capacity of participants to recognize and diagnose various types of genetic disorders
- To update the knowledge about the diagnostic genetic tests and to understand their indications, advantages and their limitations
- To increase the participants capacities to establish a proper management and follow up of the patients with genetic disorders
